

Covid-19 national framework for prisons

Stage	What this means in a prison	What we focus on
5 Complete Lockdown	There is an outbreak of the virus that we are not yet in control of.	Our total focus is on saving lives.
4 Lockdown	There are lots of infection outbreaks and we need to keep people apart to make sure everyone is safe.	We have to stop almost everything that usually happens in prison, and stay away from each other as much as possible to stop the spread of the virus.
3 Restrict	The virus is under control. We have processes to stop the spread and keep the most vulnerable people safe from catching it.	We still have to follow strict rules, but some services can start again.
2 Reduce	Getting infected is really unlikely and we can control things well if this happens.	We still have to follow safety rules like before, but more things can start up again and feel a bit more normal.
1 Prepare	The virus is not in the prison. No one is getting infected.	We are almost back to 'normal'.

Our prison is at stage:
