DAYS OF THE WEEK

The seven days of the week were named after the seven celestial bodies that were visible to the naked eye thousands of years ago. These are the Sun, Moon, Mercury, Venus, Mars, Jupiter, and Saturn. See if you can spot their translations with your naked eye below.

MONTHS

The Roman calendar originally had ten months, which explains why September, October, November and December are based on the latin words for seven, eight, nine and ten. Search for the months and their translations below.

SEA LIFE

The blue whale is the largest animal on Earth. It's heart is the size of a car and can weigh as much as 50 elephants. Search the depths of the puzzle below for some other fascinating sea creatures.
