MORE NUMBERS

A zillion is often used to describe a huge number, but it doesn't actually have a defined value. We won't make you count to a zillion, but below you will find some more numbers to add to your vocabulary.

DAYS OF THE WEEK

The seven days of the week were named after the seven celestial bodies that were visible to the naked eye thousands of years ago. These are the Sun, Moon, Mercury, Venus, Mars, Jupiter, and Saturn. See if you can spot their translations with your naked eye below.

MONTHS

The Roman calendar originally had ten months, which explains why September, October, November and December are based on the latin words for seven, eight, nine and ten. Search for the months and their translations below.

TIME & SEASONS

The seasons are caused by the tilt of the Earth as it orbits the sun. For part of the year the sun shines longer on one hemisphere resulting in summer. Tilt your head and search for these words related to time and the seasons below.

SHAPES

A dodecagon has 12 sides, while a megagon has a million sides, at which point it is essentially a circle. Time to think outside the box and find these 2D and 3D shapes in the puzzle below.

SEA LIFE

The blue whale is the largest animal on Earth. It's heart is the size of a car and can weigh as much as 50 elephants. Search the depths of the puzzle below for some other fascinating sea creatures.
