DAYS OF THE WEEK

3

The seven days of the week were named after the seven celestial bodies that were visible to the naked eye thousands of years ago. These are the Sun, Moon, Mercury, Venus, Mars, Jupiter, and Saturn. See if you can spot their translations with your naked eye below.

TIME & SEASONS

5

The seasons are caused by the tilt of the Earth as it orbits the sun. For part of the year the sun shines longer on one hemisphere resulting in summer. Tilt your head and search for these words related to time and the seasons below.

SHAPES

A dodecagon has 12 sides, while a megagon has a million sides, at which point it is essentially a circle. Time to think outside the box and find these 2D and 3D shapes in the puzzle below.

THE BODY

9

The human body is a remarkable thing, with hundreds of specialized parts that we take for granted every day. Here is a list of some important parts of the body to remember.

T	O	B	İ	İ	Ğ	A	M	R	A	P	K	A	Y	A	İ
